Mr. Norman Lougee
Water Division Engineer
Dept. of Public Works
City of Mountain View
California 94040

Dear Norm:

Enclosed are completed Application For Industrial Wastes Discharge Permit forms along with location schematics covering our five sewers in Mountain View.

Please understand that even though we are out of specification on fluorides on two sewer lines and slightly over on C.O.D. on one line, that we are actively seeking both short and long range solutions. We have engaged Lancy Laboratories of Zelienople, Penn. to conduct an industrial waste study of our facilities here in Mountain View to come up with specific recommendations on how best to handle the present and future treatment problems.

Very truly yours,

Robert W. Thompson
